CHECKMARK / DOCUMENT

Cross-platform logo identity | Version 1.0

Design principles

Rounded document, single header line, expressive checkmark.

Legible from favicon scale to desktop and mobile icons.

Master vector is SVG; PNGs are export derivatives.

Preserve icon proportions; do not stretch or recolor arbitrarily.

Palette

Navy	Coral	Rose	Blue	Cream
#183453	#FF867C	#F68A90	#31B4F1	#FFF6DB

Source SVGs: vector/ | PNG exports: png/ | Platform icons: named folders

Android: adaptive icon XML included; adjust foreground inset for your app theme.

Implementation notes

Web: use web/favicon.svg, apple-touch-icon.png and site.webmanifest.

macOS: use macos/app.icns, or app-icon-1024.png in asset catalogs.

Windows: use windows/app.ico (multi-resolution).

Linux: install a suitably sized PNG under hicolor icon theme.

iOS: import ios/AppIcon-1024.png into the Xcode asset catalog.

Android: add Android drawable/mipmap assets and adaptive icon XML.

Transparent icon variants are in vector/ and png/.

iOS icon has opaque background per app-icon requirements.

Prefer the primary gradient on light or neutral backgrounds.

Use a mono variant if gradients or light colors are disallowed.

Recommended minimum clear space

Maintain at least 8% of total icon width free on each side.

Avoid placing text, badges, or notification dots over the checkmark.
